

Stan Fris

stanfris2.0@gmail.com | +31 6 82 49 75 33 | linkedin.com/in/stan-fris | stanfris.github.io

MSc Student with a strong foundation in Information Retrieval and NLP Research. Experienced in building and evaluating neural retrieval, recommendation, and vision-language models using PyTorch and JAX. Strongly interested in working on research in the fields of Recommender Systems and Information Retrieval.

Education

University of Amsterdam – Master Artificial Intelligence September 2024 - Present

- GPA 8.1 Dutch Scale (out of 10)
- Focus: Information Retrieval (Search and Recommendation), Natural Language Processing

University of Amsterdam – Bachelor Artificial Intelligence September 2021 - June 2024

- Cum Laude, 8.6 Dutch Scale (out of 10)

Publications

Diagnosing Identifiability in Two-Tower Models for Unbiased Learning to Rank [Paper][GitHub]

Stan Fris, Philipp Hager

ACM SIGIR Conference on Research and Development in Information Retrieval (SIGIR), 2026

Improving the Efficiency and Effectiveness of LLM Knowledge Distillation for Conversational Search [Paper][Code]

Stan Fris, Jan Hutter, Jan-Henrik Bertrand, Simon Lupart, Mohammad Aliannejadi

The SCAI Workshop at the 49th ACM SIGIR Conference, 2026

A Systematic Reproducibility Study of BSARec for Sequential Recommendation [Paper][Code]

Jan Hutter*, Hua Chang Bakker*, Stan Fris*, Angela Madelon Bernardy*, Yuanna Liu

European Conference on Information Retrieval (ECIR), 2026, *Equal Contribution

Selected Research Projects

Fairness of Vision Language models in Healthcare (Pytorch) [Paper][GitHub]

- Conducted a reproducibility study of a framework for improving group fairness of CLIP.
- Expanded the original framework to be able to account for multiple types of group fairness at the same time, improving the flexibility and fairness of the model.

Domain Adaptation for Low-Resource Biomedical Translation (Pytorch) [Paper][GitHub]

- Worked on LLM finetuning for domain adaptation of neural translation models in low resource settings
- Applied fine-tuning techniques such as LoRA to effectively adapt LLMs to new tasks.

Skills

Programming: Python, C, C++, SQL

ML Frameworks: Pytorch, TensorFlow, WandB, Jax, Flax (NNX),

Systems & Tools: Slurm, Linux, Hugging Face

Languages: Dutch: Native, English: Fluent

Experience

Research Intern (Jax, Flax (NNX)), IRLab University of Amsterdam – Amsterdam August 2025 – January 2026

- Research intern in the Information Retrieval Lab with Philipp Hager
- Developed analysis framework for click modelling for search.

Teaching-Assistant and Tutor (Pytorch, Jax), University of Amsterdam – Amsterdam August 2023 – Present

- Teaching-Assistant in the Bachelor Artificial Intelligence, teaching courses on topics including machine learning, Calculus and Natural Language Processing
- Independently organizing and teaching seminars to classes of +/- 25 students.
- Organized courses working with companies, guided student-stakeholder contact.

Machine Learning Intern (Pytorch, Azure), ProRail – Utrecht October 2023 – March 2024

- Independently developed a predictive planning algorithm for Railway maintenance.
- Worked on time-series modelling with LSTMs and deterministic Max-SAT planning.

Activities

Education Committee Artificial Intelligence – Amsterdam

October 2023 – Present

- Student Member of the Education Committee for the BSc and MSc AI at the University of Amsterdam.
- Communication with Programme Director, overseeing education quality and consistency.

Faculty Student Council UvA, Amsterdam- Chair – Amsterdam

September 2022 – September 2023

- Chaired meetings, held contact with the Directive Board, Workers Council, and Central Student Council.
- Worked on files including diversity, inclusivity, and events.
